Objectives:

To contribute my skills & expertise in quality web development to an organisation which values experience and hard work. Smart work and no short-cuts. I believe if you want to be successful and grow than you have to be dedicated and focused to your goal. Big dreams leads to big achievements. And if you are getting something with hard work then you will have values for it and a self-satisfaction.

Always be open to learning and to contribute in a teamwork environment.

Work Experience:

- 1) **Webonise Lab Pvt. Ltd.**, Pune
From 21th Aug 2012 to 10th May 2016

Designation: Senior Front-end Engineer

Projects worked on:

- 1) [Proof](#): This was my last project in Webonise lab before I have resigned, this project was basically related to the documentation verifications for government works. Client wanted this project to be very interactive and fast. So we have decided to use React in front-end and in backend we have used Ruby and MongoDB. This project is under construction so couldn't able to mentioned it's working link.

Key Role: As a Front-End developer I have worked on HTML/CSS3 and Templating part in React. I have also did some API integration with React language. Also got good hand in the usage of React's inbuilt function.

- 2) www.precisionhawk.com/: This project is based on the drone application, basically a drone will take the images of the land and that images will get processed by our softwares. The readings are basically on the type of land, area, usage etc. The whole project consist of 6 differnt application with different functionalities.

Key Role: As a front-end Developer I worked on the Precisionhawk static site. I build the HTML with all the tranisitiontions and animations and Responsive UI.

- 3) www.housefull.co.in/: This is a e-commmerce site for selling household furnitures. The site is build on Angular and Python.

Key Role: I worked as a Front-End UI developers(HTML5, CSS3 and Javascript/jquery). I also worked on basic angular templates.

- 4) crucible.crucibleapp.com : This project is basically a Employee assessment application. Built on cakePHP framework. It's a very big application with CRPT and TDT as their two different major functionalities.

Key Role: I worked here as a Front-end developer mostly on HTML5, CSS3 and javascript part. I also involved in the scrum meetings and estimations and project plan meetings. I also implemented the Highcharts js in this project.

- 5) mlbdigitalacademy.com : This is a E-learning site for Major League Baseball client. This consist of training and learning process of basic techniques in Baseball as myHits and myPitch section. It also provides the data for different players, coaches, parents and leagues for this client.

Key Role:

a): I worked in it as Front-End developers. Worked on HTML5, Ccss3, Javascript, jquery and In myPitch functionality I also worked on Backbone js.

b): I also took part in the client calls, always suggested new ideas for the better UI and performance.

c): So many times clien appreciated my work and new ideas regarding Ccss3 transitions and UI Structures.

d): Took part in all meetings and scrum and Estimation meetings.

- 6) www.iimm.in : This is basically a information static single page site for my wife's institute (Institute of Indian and Modern music).

Key Role: In this site from design to code everything done by me. I used HTML5, css3 and javascript transisitions also. Used Photoshop for designing.

Job Profile/Responsibilities:

1. Provide accurate estimates.
2. Contribute to the company development standards.
3. Use of new trends and emerging technologies.
4. Code Review of team.
5. Mentoring junior teammates.

- 2) **Synechron Technologies Pvt. Ltd.,** Pune
From 13th May 2016 to till the date

Designation: Senior Associate Developer - Technology

Projects worked on:

- 1) Xaxis Turbine: This project is right now in development phase. This project is focused on the digital advertisement publication module. This company will provide some advertisement tags to publisher and consumers to detect the impression and hits on a particular advertisement.

Technologies Used:

- a) **Backbone js** in front end for integrating REST API's and frontend logic
- b) **Java** in backend.
- c) **Semantic UI** as a CSS framework for grid layout and UI modelling.

Job Profile/Responsibilities:

- a) As a front-end developer, I had to create the html and Css architecture for this
- b) Integrating REST api's in Backbone js and also implementation of MVC pattern
- c) Implementing the UI login using Semantic UI components and Backbone js components.

Education:

1. **CDAC** from Sunbeam Institute of Information Technology, Pune in 2012.
